

Be serious about safety and security

TRELLIDOR is serious about security.

As the leading brand in the barrier security industry, Johann du Plessis owner of Roll a Fold, Trellidor's Margate franchise, provides high quality products and dependable after-sales service.

"But we must all take responsibility for our own safety and we've devised a quick checklist to make it easier for people to do so," said Johann.

Trellidor's security checklist:

- Check your entire home for weak points that need additional security.
- Test your alarm and make sure it is in good working order.
- Test all door and security gate locks and place keys in a safe place.
- Lock garagedoors and don't leave automatic gate or garage door controls lying around.
- Trim shrubs around entrances so that they don't offer concealment to intruders and tidy the garden to make it look 'lived in'.
- Connect lights to time switches or motion sensors.

Safety first:

Make sure all windows are secured with barriers like Trellidor's Cottage Guard.

- Cancel newspaper and other home deliveries and arrange for someone to collect your post whenever you are away.
- Don't leave cellphones and valuables lying around.
- List emergency numbers and keep near the telephone or program them into your cellphone.
- Be part of a neighbourhood watch in order to stay informed.
