

Safe and sound: Even small windows need Trellidor security, available from Hide 'n Shade in Port Shepstone.

Windows need good security too

TRELLIDOR fits its well-known barrier security to windows as well as doors.

Fixed Trellidors act as conventional burglar guards while the sliding versions provide an escape route in an emergency such as fire or a hostage situation, or just to open up and enjoy the view.

Trellidor also manufactures Cottage Guard, certified the strongest cottage pane burglar guards on the market. Custom-made to fit the window, the openings can be spaced to match existing cottage pane windows or create a cottage pane effect.

Hide 'n Shade is a Trellidor distributor and can help you choose the correct Trellidor window security barriers for your home.
